Ferox Argentea	Weeping
Firecracker	Wheeler Hardy
Fisherii	Whittingtonensis
Foxii	Wilsonii

2 variegated, 5 sex unknown

Plus 65 local clones—44 females, 14 males,

---

Our arboretum consists of the above hollies grown together for the purpose of testing their hardiness, desirability, and various uses. For our nursery, we propagate only those clones which seem to be most promising. We also have several hundred Aquifolium and hybridized seedlings from which we hope to select new and improved hollies for the future.

### DIRECTIONS

From New York: Triborough Bridge to Grand Central Parkway to Northern State Parkway to Route 25 (Jericho Turnpike). Follow Route 25 through Smithtown turning left onto 25A at Church. Follow map via Fifty Acre Road.
